## Awareness Training on HIPAA/HITECH Compliance *Privacy, Security, Breach and Enforcement Rules*

Virtually every organization involved in the healthcare industry which creates, maintains, shares, and stores patient health information is affected by HIPAA/HITECH privacy, security, breach notification, and enforcement rules. This web-based awareness training on HIPAA/HITECH compliance prepares healthcare organizations and business associates to comply with the Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health Act (HITECH). This 60-minute course offers an overview of the HIPAA/HITECH regulations and covers the major requirements in an easy-to-use format.

- Get your workforce trained in the fastest way possible and meet department of Health and Human Service (HHS) requirements on workforce training.
- Learn from leaders in healthcare IT compliance and security education and training.
- Secure Protect Health Information (PHI) by understanding privacy, security, breach, and enforcement rules established by the HIPAA/HITECH compliance program.
- We are here for you every step of the way. Talk to our compliance professionals before, during or after your online courses and get your questions answered.

The purpose of this course is to give healthcare professionals like you:

- ✓ The knowledge and background information you will need regarding HIPAA/HITECH compliance rules which provide federal protections for personal health information held by covered entities and business associates
- ✓ Background on protected health information identifiers
- ✓ Understanding of your responsibilities for protecting patient information
- ✓ Awareness of consequences for violations if you fail to comply with the rules' requirements.

# Training for Healthcare Staff

## Security Awareness Training

### Did You Know?

- All your employees who are handling protected health information need to be aware of privacy, security, breach and enforcement rules
- Office for Civil Rights(OCR) is conducting periodic HIPAA/HITECH audits to ensure employees are trained properly
- The weakest link in a breach incident is poor employee training

### Our Promise for You

- ✓ You'll save time and money
- ✓ Meet mandated compliance requirements
- ✓ We train, assess, track and report for you
- ✓ Our courses are reviewed & updated regularly

### *Security Reminders, Best Practices, Tips and Tools for Protecting Patient Health information*

More and more practices are adopting new and innovative technologies and investing more of their money in procuring these technologies. Our thirst for new devices, computers, smartphones, cloud computing services, gadgets and connected network seems to have no limits. Our growing dependence on technology, coupled with increasing threats and risks to privacy of health information, demands greater security awareness of one's staff.

To address this need, EHR 2.0 has developed an awareness course aimed at increasing the understanding of security threats and empowering healthcare professionals to be safer and more secure when handling electronic protected health information. Security is a shared responsibility and we each have to do our part to keep the practice safe. When we all take simple steps to be safer, it makes using technology a more secure, efficient and effective experience for everyone.
